HUMAN BIOSCIENCES

Mrs.Valli (58, F)

Diabetic Foot Ulcer

Treatment

by

Dr.Deepak M.S

Military Hospital

Chennai and Mr.Prabhu HBS.

HUMAN BIOSCIENCES

Mrs. Valli, 58, a diabetic patient diagnosed 25 years ago was admitted in the Military Hospital, Chennai, India for an infected wound. She stayed in the hospital for 15 days. Surgical debridement of her wound was performed by Dr.Deepak M.S..

Her wound was so deep that the bone and tendons were visible. After nine dressings of Medifil II and fifteen dressings of SkinTemp II - the wound was managed entirely.

Dressings begun on 13th September, 2012 and continued until 15th November. The final picture was taken on 17th December, by then the wound has closed and healed significantly.

Thanks to Mr.S.N.Prabhu B.M of Chennai, who diligently performed his duties and carried out dressings regularly.
